

Southward Equinox days after Last Sunset of *Elul* (Rectified Hebrew Calendar)

Traditional Postponements, Fixed Month Lengths, Jerusalem mean time, 130/353 cycle, $\Delta=133$, traditional *molad*)

— *Rosh HaShanah*
 — *Yom Kippur*
 — *Sukkot*
 — *Hoshanah Rabbah*

Black trend is curved because the Rectified Hebrew Calendar 130/353 cycle approximates the Northward Equinoctial year length, which is slightly longer and much more stable than the comparatively rapidly changing Southward Equinoctial year length.
